Recommendation

Dear Sir or Madam,

as per agreement the German Association of Food Quality controllers tested the Food Inspection Case EB 4401. The new Food Inspection Case EB 4401 was upgraded with the following precision measurement instruments:

Data Logger:	EBI 300
Food Oil Monitor:	FOM 330
ph Tester	PHT 810
Laboratory Thermometer:	TFX 422
Dual Infrared /Fold Back Thermometer:	TLC 750

These precise and reliable measurement instruments are predestined to increase food safety with proper application. Self-explanatory the new Food Inspection Case EB 4401 includes scissors, tweezers, deep freeze driller, knives and flashlights.

Therefore the EB 4401 is the perfect instrument not only for food inspections, but is also essential for the food industry.

According to this clear inspection result we allow you to use our association mark with the following addition:

„Recommended by the German Federal Association of Food Inspectors e. V.“

For the time period from 01/01/2020 until 31/12/2020 in your sales documents and promotion material. This recommendation is allowed for international usage during the mentioned time period.

Yours sincerely,

Anja Tittes
(Federal Chairman)
